DIMENSION AND DENSITY

Sometimes we confuse them.

The **dimensions** are the exact outcome of the projection of the Universal Consciousness as it is manifested in the imagination of our thought. They are therefore the worlds such as we imagine them to be!

A **density** signifies a level of development measured in relation to the proximity with the Source of all things or the universal Consciousness.

There are 3 physical densities and 3 etheric densities and in the middle, is the 4th density, which is both at the same time.

This Knowledge of the seven densities was revealed by the seven-branch candlestick : the Menorah.

See [“Dialogues with our Angel n° 42”](#).

7 levels of densities exist therefore and each one of them includes infinite dimensions and multiple temporal lines.

The “body” of the human being evolves in these 7 densities, which are defined by these 7 levels of reality. These different realities envelope the different layers of the body of the Being and are expressed by the 7 psychic centers. The esoteric traditions call them “subtle bodies”. (See <https://casswiki.net> for a synthesis on the seven densities)

Given that the human Being belongs to the 3rd density level we can consider that only the motor center, the lower emotional center and the lower intellectual center are manifested in human beings. *They exist in the 3rd density by means of the 3 principle bodies of existence: the thinking/awareness center, the spiritual/etheric center and the physical center, in the knowledge that the physical center also contains the genetic body or the DNA, which plays the role of interface with the outer reality.*

To see the difference between densities and dimensions more clearly, we can refer to a symbolic vertical and horizontal vision.

- The densities are distributed along the vertical axe of Consciousness, from the mineral realm, passing through the human just until “the Source”.
- The dimensions can horizontally occupy a density. For example, in our 3rd density world, certain individuals can perceive the dimension of Elementals or nature spirits.

Nevertheless, the contacts can intersect; for example the dimensions of the 4th density can interact with the dimensions of the 3rd density, such as Grays with humans !
