

**The truth is somewhere else**

*Tonight, it is again my friend Christine that comes to me to encourage me and support us in the unsettling events that we are going through.*

*Christine was a childhood friend deceased in 1987 following a leukaemia. She comes to talk to us in the name of the people of 5th dimension of consciousness where she remains actually :*

I come to you in order to deliver some information regarding your interior and external state of being. You have a few reasons to be shoved in your physical, energetic bodies and in your cells in these very strong moments of your current terrestrial life.

I come to give you some explanation to the disasters that have just happened and that particularly touch Japan. The events of this 11th of March are linked to a disguised attempt of the slow annihilation of the current humanity, orchestrated by the Anunnaki entities in order to take hold of their calendar.

I convey yourselves in paying close attention to the date that signs of itself the origin of this horrible act. For these belligerent Beings, 11 is a fetish number symbolising chaos, the end of unity and the beginning of a new cycle. The month of March in reference to Mars, “god” of war in roman mythology.

The Illuminati archons have installed a war certificate against Mother Earth and humanity. They have made explode a nuclear machine in strong depth, at the junction of four large tectonic plates that “immobilise” the two Asian and Pacific continents. Likewise, they have used a pulsed wave technology to weaken the fundamental structures of nuclear power stations located on the trajectory of the breach of the tectonic rifts. The radioactive emanations of the explosion of their machine have quickly been hidden by the explosion of the nuclear central station itself.

Despite the gravity of their action, this one is however part of the transition process. It accelerates the departure of a large part of humanity, towards a new cycle of incarnation on other plans. Nevertheless, these belligerent beings that do not have any emotions feel cornered. Their thirst of power and their violence are exacerbated by the vibrating acceleration of Mother Earth and the progressive awareness of humanity. The awakening capacity, of compassion and love of the human being, annoys considerably their Machiavellian plans.

On the geopolitical level, this disaster will have for impact to shaken consciences still “sleeping” and to offer to humanity to understand the real dangers of nuclear technology. Their horrible action will mark the start of a tidal wave of revelations revealing in broad daylight many plots and conspiracies of all sorts.

This nuclear disaster runs the risk of also affecting the human being to more subtil levels. On the level of Beingness, the cellular memories linked to the destruction of Atlantis can rise up in your emotional memories, as this continent has disappeared in the same way by a nuclear destruction. Many of you have lived this very traumatising moment. That is for this reason that you currently feel tired, off-centred, vacated, nervous. This is absolutely rational and completely consistent.

Through the events of Japan, many of you have reactivated in their cellular memories the last moments of Atlantis. But this time, something has changed. You haven't left planet Earth yet, as you have chosen, before your incarnation, to stay in order to accompany the human being in his vibrating transition.

During this transition, there will be so many geological and geopolitical changes that you will soon not be able to recognise the environment in which you are evolving today. The human being will not be able to function the same way as he is doing currently.

I come again to reassure you, you have nothing to fear from the radioactive fallouts of this disaster. Your proper vibration and the technology of your galactic brothers are already implementing in order to neutralise and transmute the harmful effects of the radioactive radiations. We encourage yourselves to stay focused in avoiding all predictions of a fatal future in your future. Continue to trust in the divine being that you are. Remember, you are the creators of your own reality. Even if the world collapses around you and this might still happen, do not forget that love inside yourselves, trust in your Superior Self and in your perception will always make it possible to be at the right place at the right time.

You can now decide to create your new reality. You have chosen to co-create the New Earth and that is what you will achieve. We will be on your sides to accompany you in your transition. It is however very important to reach in keeping the psychological and emotional balance during the period of the global transition.

Dare to be who you are to live your life in joy, the true love and that without any judgement, without any guilt. Each human being can choose to stay attached to his fears and to hang itself up to the illusory comfort of the old paradigm, or to open his heart to renewal and to its liberation.

Accept to be scared of the unknown but trust in the divine Being that you are and welcome the upcoming events. You will assist to the most grandiose experience of transformation of consciousness that the human being can realise through his incarnation bodies.

I have accomplished this wonderful experience of transition, the only difference is that I have left my physical body when I died. Among other things, my soul had made that choice to let me accompany you through the communications of Jenaël.

When I found myself on the other side, I was amazed by what I could see. I could see myself as I am without the veil of illusion and I could see other souls in all of their splendour. I guarantee that what is on the other side is immensely wonderful. Know that all of the beings that are currently leaving their plans of incarnation are welcomed. These souls have been willing participants in accompanying those that have stayed in the incarnated plans, during the Ascension of humanity of Mother Earth.

I therefore invite you to celebrate these great planetary changes that are coming. I wish you, in these difficult moments, my encouragements.

Your friend, Christine.
